

DESIGNCORE[®] RS-1843A/RS-6843 mmWAVE RADAR SENSOR EVALUATION KIT

Bring the rich feature set support of mmWave radar into your automotive or industrial application.

Implement one of many different mmWave radar sensing algorithms to measure, detect, and track

The DesignCore[®] RS-1843A/RS-6843 mmWave Radar Sensor Evaluation Kit is simple but feature-rich sensor based on the Texas Instruments AWR1843/IWR6843 RFIC. The AWR1843/IWR6843 has a full radar transceiver with 3 transmitters and 4 receivers, a Hardware Accelerator for processing raw data samples, a C67XX DSP for algorithms, and an ARM processor for decision-making and interfacing. It provides a hardware and software starting point for your design. This sensor's third transmitter enables both azimuth and elevation sensing.

The RS-1843A/RS-6843 Sensor has USB-Serial, I2C, SPI and GPIO interfaces. Many algorithms are available as a basis for a solution for your application.

D3 Engineering supports OEM/ODM customers with embedded system development and customized production modules for radar applications.
